

Cloud Unified Communications offers the most comprehensive suite of Unified Communications (UC) software available today, and all from the cloud. It also offers an additional level of flexibility by allowing individual UC applications to be accessed from the cloud to complement and enhance your existing communications infrastructure. Cloud UC services include voice and video calling, voicemail, visual voicemail and voice mail transcription services, Meet Me conferencing, Business Continuity Planning and One Number Business Line Mobility solutions.

The One Number Business Line Mobility solution enables premises-based PBX users the ability to expand the reach of the business line to an IP connected smartphone anywhere in the world. Temovi apps for smartphones and tablets allow employees to make and receive voice and video calls as if they were sitting at their desk. With one number that can reach both desk and mobile phones, employees can now become mobile-enabled both in and out of the office. When used in conjunction with Wi-Fi hotspots, roaming and long distance charges can also be significantly reduced.

Benefits

Communications are a business imperative and simplifying communications is what Cloud UC is all about. With Cloud UC's One Number Business Line Mobility solution, enterprise road warriors, teleworkers or office-based employees can always be in touch. Having a single business line for customers or colleagues allows businesses to simplify and enhance the communications experience, whether at the desk or across the world.

Cloud UC allows you to deploy a One Number Business Line Mobility solution as an overlay to your premises-based system. This allows CIOs to extend the life of the current on-premises systems, yet offer the latest UC capabilities to their mobile employees, creating a win-win for the CIO and the employees.

Features

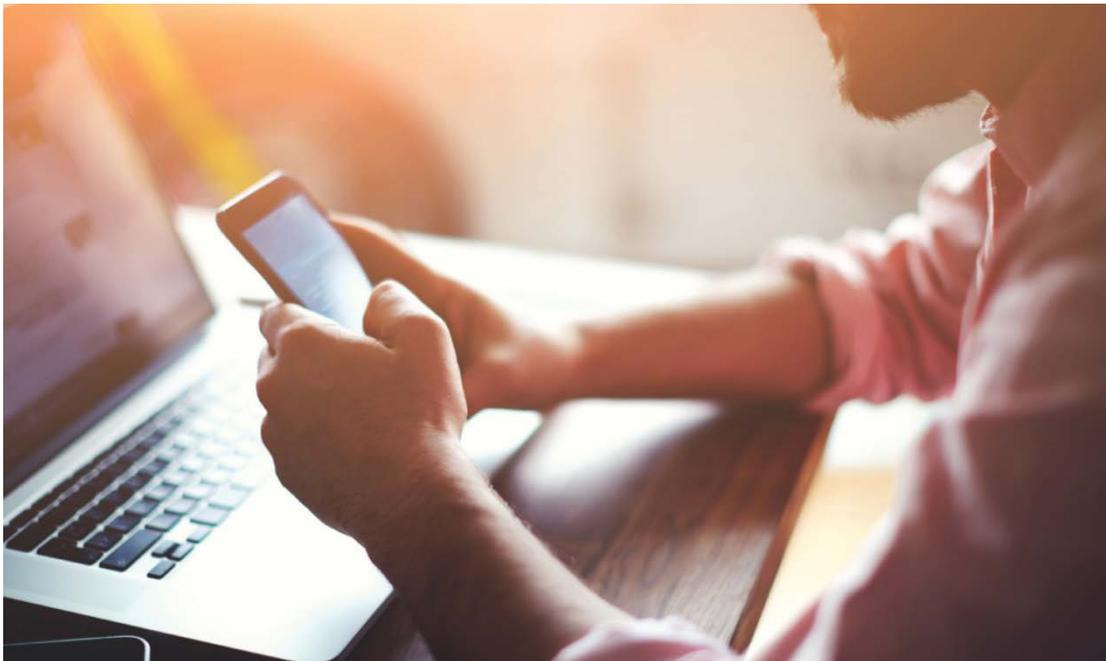

The Temovi application is available for users of iOS and Android smartphones and tablets.

- Presence State information for all Business Line Mobility users.
- Instant messaging between Business Line Mobility users.
- WiFi, 3G and 4G calling capabilities.
- WiFi to 3G/4G call handoff.
- Call Push from Temovi Application, from WiFi or 3G/4G data to cellular.
- Integration with local (smartphone) and Enterprise/Corporate directories.
- One touch Meet-Me Conferencing Login (when purchased with Meet-Me Conferencing).
- No Long Distance charges.

Why Temovi Cloud UC?

- Cloud UC extends its best-in-class products and approach to cloud unified communications.
- Cloud UC's Temovi app is a state-of-the-art Unified Communications application that integrates IM, presence, voice, video and corporate directories for business use.
- Cloud UC includes a comprehensive portfolio of unified communications capabilities for the enterprise.
- Cloud UC's unified communications solutions interoperate with a broad range of endpoints and mobile devices, providing flexible solution offerings.
- Cloud UC's services expertise and experience enables complementary offerings to existing on-premises equipment with trusted partners to help migrate from legacy on-premises systems to the cloud.
