Igniting a new age of mobility and productivity
Today's knowledge workers are highly mobile, leveraging a mix of their own (BYOD) or work-supplied smart-.phones and tablets to stay connected everywhere, redefining the meaning of being "in the office." Businesses are being driven to adopt new technologies that help employees collaborate effectively from anywhere, from any device, increasing the speed of business.

Consumer oriented Over-the-Top (OTT) services may be seen as a quick and cheap fix or feature-rich, cloud-based, collaboration services. Unfortunately, they lack the kinds of controls and consistency required to deliver enterprise-class, organization-wide solutions. They fail to address appropriate management controls, security, interoperability and consistent services. CIO and IT managers, need simpler, safer, and more cost-effective means to unify communications.

Temovi's Smart Office solution is a Unified communications solution that has been designed for a mobile world; revolutionising the way employees interact in the workplace. It is ready for work on a tablet, a smartphone, even on a WebRTC enabled browser. Smart Office allows enterprises to consolidate and simplify their employees' communications experience; making them more accessible and more productive. Smart Office can be rolled out as a hosted service from a service provider (UCaaS), deployed inside the enterprise or in a private cloud. Finally, one solution that increases collaboration and reduces decision making times as it simplifies integration of BYOD devices and mobility.

Smart Office contains multiple, high value services:

- **Clients:** Choose clients for the way you work. PC, Mac, iOS and Android as well as WebRTC-enabled browsers. Just point and click to connect and collaborate. Manage IM, presence, group chat, voice, video and screen share from a single place. Use a unified enterprise directory to connect one or a dozen peers. Work from anywhere, don't wait to get back to the office to get more done.

- **Voice and Video Conferencing:** Reservation-less conference services from anywhere. Skip the dedicated room and convoluted set-up, be ready to address that important discussion that closes deals and resolves issues. Just point, click and decide.

- **Screen Sharing:** Share desktop content to large audiences, even invite guests in seconds. Escalate a call or video conference into a fully interactive sharing session. Improve productivity and avoid unnecessary travel.

- **Call Grabber:** A fixed-mobile convergence service. Users can seamlessly grab a live call and move it from one device to another and move it back. No need to wait in the office or a call to end – grab it from a smartphone, or even a plain mobile, and take it along

- **Intelligent Messaging:** Increasing productivity can be as simple as prioritizing work. Intelligent Messaging keeps employees connected even if they can't collaborate in real time. A feature rich mail service with visual messaging that can be accessed from a mobile application, web browser, traditional phone or email. Unified Messaging also includes speech-to-text message transcription and auto attendant features.
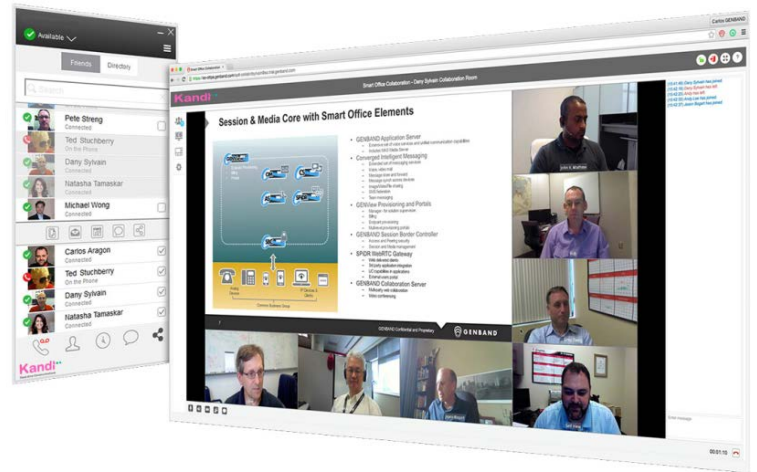

IM – Presence – Group Chat – Voice – Video – Conferencing – Collaboration – Screen Share

Temovi Smart Office provides rich user experiences from a single client, avoiding the complexity and expense of purchasing disparate collaboration tools. Easily start a conversation with a simple IM and finish with multiparty video conference and screen share.

Smart Office goes well beyond the standard Unified Communications by providing WebRTC-based services that eliminate the need to deploy and manage device specific clients. Smart Office's RESTful APIs enable integration with enterprise applications and third party developers.

Smart Office is powered by Temovi's market-leading Application Server solution, a full-featured telephony and multimedia applications server with millions of active subscribers, servicing mobile, VoIP and IMS networks worldwide. The Temovi Application Server provides consumer and business services, SIP trunking as well as Unified Communications for Mobile, Fixed, Broadband and Cable Operators as well as large enterprises.

The Temovi Application Server can be deployed in an enterprise premises, in a private cloud or as a hosted service in a service provider network. Regardless of deployment, the end user experience is the same.
